SUN-Xiaoying

IMPACT FOCUS

Results-driven Software Engineer with 4+ years of experience building scalable distributed systems at Booking.com, Klarna, and Shell. AWS Certified Developer with expertise in Java, Python, and Cloud-native architectures.

TECH SKILLS

Programming Languages: Python Java TypeScript C++ Perl Scala

Cloud: AWS Lambda Step Functions CloudFormation CloudWatch Docker Kubernetes GCP

Frameworks & Observability: Spring Boot React Django Vue Linux Datadog Grafana Kibana Loki Honeycomb

Databases: MySQL Kafka AWS DynamoDB ElasticSearch Snowflake CockroachDB Google Firebase

Certifications: AWS Certified Developer (Associate) AWS AI Practitioner AWS Cloud Practitioner

WORK EXPERIENCE

Software Engineer | Booking.com

Nov 2024 – Present

Amsterdam, Netherlands

- Reservation Platform Modernization:** Modernized core reservation services to support new booking and accommodation-change flows, improving scalability, production readiness, and cross-service data consistency.
- Reliability & Production Ownership:** Improved service health through on-call support, incident follow-ups, monitoring dashboards, alert cleanup, and cross-team investigations for customer-impacting reservation issues.
- Security, Compliance & Legacy Cleanup:** Strengthened service-to-service authorization, migrated legacy data access paths for compliance, and decommissioned obsolete jobs and endpoints to reduce operational risk.

Site Reliability Engineer | Shell Recharge Solutions

June 2023 – Oct 2024

Amsterdam, Netherlands

- Test Automation:** Engineered an E2E automation framework integrating OCPP simulators and 3rd-party APIs to validate payment flows across Mobile, RFID, Credit Card, and QR code.
- Payment Process Optimization:** Optimized credit card processing to dynamically handle secondary charges, preventing premature session drops and securing full revenue capture.
- Cross-Functional & Field Leadership:** Aligned technical requirements across EU and US teams and conducted on-site hardware testing to ensure software-to-charger reliability.

Backend Developer | Klarna

June 2022 – June 2023

Stockholm, Sweden

- Revenue Protection:** Engineered dynamic loan-term adjustment logic for high-risk accounts, accelerating debt collection and reducing overall credit loss.
- System Integration:** Integrated the Papaya third-party ledger service using AWS Document Storage to securely process affiliate loan requests with high transactional integrity.

Thesis Worker | Scania

January 2022 – June 2022

Södertälje, Sweden

- Thesis:** Built a cloud-native Smart Charging Management System (CPMS) using Spring Boot, AWS, and the OCPP protocol; engineered greedy algorithms integrating real-time Nord Pool electricity prices to optimize energy consumption for heavy-duty electric trucks.

EDUCATION

MSc Software Engineering of Distributed Systems | KTH Royal Institute of Technology

08/2020 – 06/2022

Stockholm, Sweden

- Thesis: Development of a charging management system for heavy-duty trucks

BSc Software Engineering | Dalian University of Technology

09/2016 – 06/2020

Dalian, China

- Thesis: Research and Implement on Fast Hybrid Multi-Frame Matching Algorithm
