

XIAOYING SUN

Software Engineer | Distributed Systems, Cloud & Reliability

@ xiaoyingsun523@gmail.com

+31 685301165

Amsterdam, Netherlands

xiaoying-sun

SUN-Xiaoying

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building and operating distributed, cloud-native systems across travel, fintech, and EV charging. Strong in Java, Python, AWS, service integrations, production reliability, and observability, with an international track record.

TECHNICAL SKILLS

Certifications: AWS Certified Developer – Associate, AWS Certified AI Practitioner, AWS Certified Cloud Practitioner
Backend & Integration: Java, Python, Scala, Perl, Spring Boot, Django, REST APIs
Cloud & Platform: AWS, Lambda, Step Functions, CloudFormation, Docker, Kubernetes
Data & Messaging: MySQL, Amazon DynamoDB, Kafka, Elasticsearch, Snowflake, CockroachDB
Observability: Grafana, CloudWatch, Datadog, Kibana, Loki, Honeycomb
Domain Experience: OCPP, CPMS, EV Charging, Nord Pool

WORK EXPERIENCE

Software Engineer | Booking.com

Nov 2024 – Present

Amsterdam, Netherlands

- AI Enablement & Knowledge Sharing:** Won a GenAI hackathon track with an AutoGenKit tool that automates SonarQube remediation. Built reusable Codex and Claude skills and agents, including Slack and GitLab bot workflows.
- Platform Modernization:** Built modern reservation workflows with AWS Lambda, Step Functions, and CloudFormation to replace legacy services. Led API and order-storage changes from integration testing through staged production rollout.
- Data Migration & Decommissioning:** Owned 19 legacy query migrations and enabled 10 across 15 service roles. Mapped dependencies for 12 legacy endpoints, authored four modernization plans, and retired obsolete endpoints, database tables, and scheduled jobs.
- Reliability & Production Ownership:** Improved production reliability through Grafana and CloudWatch dashboards, alert tuning, and on-call resolution of customer-impacting incidents.

Site Reliability Engineer | Shell Recharge Solutions

Jun 2023 – Oct 2024

Amsterdam, Netherlands

- Test Automation:** Engineered an E2E automation framework integrating OCPP simulators and third-party APIs to validate payment flows across Mobile, RFID, Credit Card, and QR code.
- Payment Process Optimization:** Optimized credit card processing to dynamically handle secondary charges, preventing premature session drops and securing full revenue capture.
- Cross-Functional & Field Leadership:** Aligned technical requirements across EU and US teams and conducted on-site hardware testing to ensure software-to-charger reliability.

Backend Developer | Klarna

Jun 2022 – Jun 2023

Stockholm, Sweden

- Revenue Protection:** Engineered dynamic loan-term adjustment logic for high-risk accounts, accelerating debt collection and reducing overall credit loss.
- System Integration:** Integrated the Papaya third-party ledger service using Amazon DocumentDB to securely process affiliate loan requests with high transactional integrity.

Master's Thesis Engineer | Scania

Jan 2022 – Jun 2022

Södertälje, Sweden

- Thesis:** Built a cloud-native Smart Charging Management System (CPMS) using Spring Boot, AWS, and the OCPP protocol; engineered greedy algorithms integrating real-time Nord Pool electricity prices to optimize energy consumption for heavy-duty electric trucks.

EDUCATION

MSc Software Engineering of Distributed Systems | KTH Royal Institute of Technology

Aug 2020 – Jun 2022

Stockholm, Sweden

- Thesis: Development of a charging management system for heavy-duty trucks

BSc Software Engineering | Dalian University of Technology

Sep 2016 – Jun 2020

Dalian, China

- Thesis: Research and Implementation of a Fast Hybrid Multi-Frame Matching Algorithm
